SUMMARY

Full-stack Software Engineer experienced in building web and mobile applications with JavaScript/TypeScript, React, and React Native. Brings an engineering background and a passion for prototyping, problem-solving, and continuous learning. Seeking opportunities to contribute to meaningful work in collaborative teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML, CSS

Frontend: React, React Native, Vue.js, TailwindCSS

Backend: Node.js, Express.js, Java (Struts framework), JSP, RESTful APIs

Databases: MongoDB (Mongoose), PL/SQL, Firebase, Supabase, BigQuery

Tools & Methods: Git, Unit Testing (Mocha, Chai), Selenium, Tableau, Agile/Scrum

WORK EXPERIENCE

Software Engineer 1 | Millipede Pte Ltd

Jan 2026 – Present

- Developed and shipped production mobile app features using **React Native and TypeScript**, and enhanced React-based web admin portals
- Performed QA including backward compatibility and regression testing, and wrote unit tests to ensure feature reliability
- Managed app deployments to **TestFlight, Apple App Store, and Google Play Store**
- Built automated scripts to maintain and clean **Firebase and BigQuery** databases, improving data integrity

Software Engineer | VisionPower Semiconductor Manufacturing Company (VSMC)

Jul 2025 – Jan 2026

- Designed and shipped a web application that automated the manual e-invoice editing process for the finance team, resulting in **>90% time savings** across the entire department
- Developed **RESTful API endpoints** in Java for an AS/RS (Automated Storage and Retrieval System) warehouse project, enabling integration between warehouse hardware and ERP systems
- Maintained and enhanced multiple ERP applications using Java, JSP, Struts framework and PL/SQL, improving app performance and user experience
- Co-built a **Python + Selenium** web automation tool to download attendance reports, eliminating repetitive manual work for HR operations

Demand Planner | Halliburton Far East Singapore

May 2024 – Dec 2024

- Applied data analysis and advanced Excel techniques to optimize inventory management, reducing stranded inventory by over **\$800,000**
- Collaborated with procurement and operations teams to improve demand forecasting accuracy by **50%**
- Managed multi-location materials planning using SAP, ensuring alignment with production schedules

Senior / Analog Layout Engineer | Marvell Asia Pte Ltd

Jul 2022 – May 2024

- Led a cross-functional team of **15 engineers** across Singapore and Taiwan to deliver a 55nm PMIC project on schedule
- Coordinated with USA stakeholders and the India-based design team to manage timelines and drive process improvements
- Developed training materials and onboarding documentation to upskill entry-level engineers, improving team ramp-up time

PROJECTS

Barber Booking Management System | *Vue.js, JavaScript, Express.js, MongoDB*

Full-stack booking management app for a local barber with role-based access control and an automated email service.

[GitHub](#) | [Live Demo](#)

Height Tracking Dashboard | *React, TypeScript, Express.js, Supabase*

Personal project to record and visualize height trends over time on an interactive dashboard.

EDUCATION & CERTIFICATIONS

Software Engineering Immersive — General Assembly	Mar 2025
Bachelor of Electrical and Electronic Engineering — NTU	Aug 2018 – May 2022
Data Science and AI Bootcamp — Vertical Institute	Oct 2024
Data Analytics Bootcamp — Vertical Institute	Nov 2023
Foundational C# with Microsoft — Microsoft	Nov 2024
Python for Data Science, AI and Development — Coursera (IBM)	Mar 2024
